

Dear Members of the Commerce Committee,

I request that you vote NO to the proposed bill HB5263. Rabbits are the third most common household pet - right after our beloved dog and cat. A beautiful animal that gives love, company and enjoyment to their owners I find it concerning that our state is contemplating allowing factory like farming/slaughter houses for rabbits. Please take pause and vote No to a bill that will take humanity back several decades - remember, rabbits are DOMESTICATED animals. What will be next? Slaughter houses for cats and dogs?

Thank you for your consideration.
